<i>Service Manager</i>	<i>Service Reception</i>	<i>Supervisor</i>	<i>Parts Manager</i>

TITLE: Revised clip to secure door latch release rod.

REASON: To improve security of control rod to interior release handle.
The size tolerance of the hole in the interior release handle for the operating rod, may, on some cars, provide insufficient security of the rod clip.

ACTION: If the control rod is found to have detached itself from the interior release handle, discard the existing rod end clip and refit using the following parts:

<i>Description</i>	<i>Part number</i>
Clip, control rod to handle	A082U6267F
Bush, top hat, release rod end	A111U6049F

Fit the new clip into the handle lever before then inserting the bush into the bore of the clip. Finally, press the rod end fully into the bush.
